

Prontosan® contains Betaine and Polyhexanide (PHMB) that have a double effect on the wound bed, helping to reduce healing time through creating optimal wound healing environments.

Benefits of Prontosan® Solution:

- Helps to prevent and remove the formation of biofilm - a barrier to wound healing
- Helps to reduce bioburden to reduce risk of infection
- Facilitates gentle dressing replacements through moistening of dressing
- 100% recyclable (LD-PE)*, non-allergenic containers and labels: PVC-free, DHP-free and latex-free

*check local recycling guidelines before recycling.

Prontosan® Wound Irrigation Solution

For cleansing, decontamination and rinsing
of acute and chronic skin wounds
